

MUHAMMAD HASSAAN

Full Stack Developer

Mailsi, Punjab, Pakistan | hassaanashfaq51@gmail.com | +92 311 6647440

SUMMARY

Passionate Full Stack Developer with hands-on experience building responsive and scalable web applications using React.js, Node.js, Express.js, and Supabase. Currently gaining industry experience through Full Stack Development internships while delivering modern, user-focused web solutions and continuously enhancing my technical expertise.

PROFESSIONAL SKILLS

- React.js
 - JavaScript (ES6+)
 - HTML5
 - CSS3
 - Node.js
- Express.js
 - Supabase
 - Git
 - VS Code
 - Vercel
- REST APIs
 - Authentication
 - CRUD Operations
 - Responsive Web Design

PROFESSIONAL EXPERIENCE

Decode Lab, Full Stack Developer Intern

Current

- Develop responsive websites and web applications using modern frontend technologies.
- Build reusable and interactive UI components with clean, maintainable code.
- Collaborate with developers to create responsive and user-friendly interfaces.
- Work on real-world internship projects while following industry best practices.

Arch Technologies, Full Stack Developer Intern

Current

- Develop full-stack web applications using React.js, Node.js, Express.js, and Supabase.
- Build responsive frontend interfaces and backend functionality.
- Work with REST APIs, authentication, database integration, and CRUD operations.
- Collaborate with senior developers to deliver scalable software solutions.

PROJECTS

U2 Collective HR Portal

React.js • Node.js • Supabase • JavaScript

Designed and developed a complete HR Management Portal featuring employee management, attendance tracking, leave management, document management, role-based authentication, dashboards, and responsive user interfaces. Built both the frontend and backend with secure Supabase integration.

TaskPilot — Modern Productivity Web App

HTML5 • CSS3 • JavaScript • Local Storage

Developed a responsive task management application with CRUD-style task operations, priorities, categories, due-date tracking, search/filter/sort functionality, progress statistics, theme switching, Local Storage persistence, and interactive UI animations.

PROJECTS (CONTINUED)

Database Integration — User Management API

[Node.js](#) • [Express.js](#) • [MongoDB](#) • [Mongoose](#)

Developed a database-integrated User Management REST API using Node.js, Express.js, MongoDB, and Mongoose. Implemented complete CRUD operations, schema validation, persistent data storage, environment-based configuration, and centralized error handling, with API testing performed through Postman.

Backend API Development

[Node.js](#) • [Express.js](#) • [REST API](#) • [Postman](#)

Developed a modular RESTful backend API using Node.js and Express.js, implementing structured API routes, request handling, CRUD operations, input validation, and centralized error handling. Tested and verified API endpoints using Postman.

TaskFlow — Modern Task Management Landing Page

[HTML5](#) • [CSS3](#) • [JavaScript \(Vanilla\)](#)

Designed and developed a modern, fully responsive landing page for a task management platform as my first internship project at Decode Lab. Built using HTML, CSS, and Vanilla JavaScript with clean UI design, responsive layouts, smooth interactions, and optimized user experience.

EDUCATION

COMSATS University Islamabad, Vehari Campus

2023 – 2027

Bachelor of Science in Computer Science

Punjab Group of Colleges, Mailsi

2020 – 2022

FSc (Pre-Medical)

Government Boys High School, Mailsi

2018 – 2020

Matriculation
