

MUHAMMAD HASSAAN

Full Stack Developer

Mailsi, Punjab, Pakistan | hassaanashfaq51@gmail.com | +92 311 6647440

SUMMARY

Full Stack Developer skilled in React.js, Node.js, Express.js, and Supabase, with hands-on experience building responsive and scalable web applications. Experienced in frontend development, backend APIs, database integration, authentication, and modern UI development.

PROFESSIONAL SKILLS

- React.js
 - JavaScript (ES6+)
 - HTML5
 - CSS3
 - Node.js
- Express.js
 - Supabase
 - Git
 - VS Code
 - Vercel
- REST APIs
 - Authentication
 - CRUD Operations
 - Responsive Web Design

PROFESSIONAL EXPERIENCE

- Decode Lab**, Full Stack Developer Intern

Completed

 - Developed responsive web interfaces using HTML5, CSS3, and JavaScript with a focus on clean, user-friendly UI.
 - Built RESTful backend APIs using Node.js and Express.js with structured routing, CRUD operations, validation, and error handling.
 - Integrated MongoDB using Mongoose for database-driven applications and implemented persistent data storage.
 - Tested and verified API endpoints using Postman while following structured development practices.
- Arch Technologies**, Full Stack Developer Intern

Current

 - Developed full-stack web applications using React.js, Node.js, Express.js, and Supabase.
 - Built responsive and interactive frontend interfaces with reusable React components and modern UI practices.
 - Implemented authentication and role-based access to manage secure user interactions and application functionality.
 - Integrated Supabase for database management, data persistence, and secure application functionality.

PROJECTS

- U2 Collective HR Portal**

React.js • Node.js • Express.js • Supabase

Designed and developed a complete HR Management Portal featuring employee management, attendance tracking, leave management, document management, role-based authentication, dashboards, and responsive user interfaces. Built both the frontend and backend with secure Supabase integration.
- TaskPilot — Modern Productivity Web App**

HTML5 • CSS3 • JavaScript • Local Storage

Developed a responsive task management application with CRUD-style task operations, priorities, categories, due-date tracking, search/filter/sort functionality, progress statistics, theme switching, Local Storage persistence, and interactive UI animations.
- Database Integration – User Management API**

Node.js • Express.js • MongoDB • Mongoose • REST API • Postman

Developed a database-integrated User Management REST API using Node.js, Express.js, MongoDB, and Mongoose. Implemented complete CRUD operations, schema validation, persistent data storage, environment-based configuration, and centralized error handling, with API testing performed through Postman.
- Backend API Development**

Node.js • Express.js • REST API • JavaScript • Postman

Developed a modular RESTful backend API using Node.js and Express.js, implementing structured API routes, request handling, CRUD operations, input validation, and centralized error handling. Tested and verified API endpoints using Postman.
- TaskFlow – Modern Task Management Landing Page**

HTML5 • CSS3 • JavaScript (Vanilla)

Designed and developed a modern, fully responsive landing page for a task management platform as my first internship project at Decode Lab. Built using HTML, CSS, and Vanilla JavaScript with clean UI design, responsive layouts, smooth interactions, and optimized user experience.
- Personal Portfolio Website**

React.js • JavaScript • CSS • Vercel

Designed and developed a fully responsive portfolio website showcasing my projects, technical skills, and contact information with modern UI/UX, smooth animations, and optimized performance.

EDUCATION

- COMSATS University Islamabad, Vehari Campus**

2023 – 2027

Bachelor of Science in Computer Science
- Punjab Group of Colleges, Mailsi**

2020 – 2022

FSc (Pre-Medical)
- Government Boys High School, Mailsi**

2018 – 2020

Matriculation
